**Re Item V**

**Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1). Reference is made to the following documents:

D1: WO 01 75842 A1

D2: FR-A-2 632 4311

2). With particular reference to figure 2, document D1 discloses a seal comprising a thin body (12), one end of which is solidly connected to a panel (18), and the opposite end can be housed in a tubular passage with means for supporting the thin body; whereby the seal comprises a head (17,2a,2b) which adjoins the panel (18) and is attached to said panel by means of a weakened portion of material (15) which forms a rupture line and enables the seal to be used with the head connected to the panel, the seal forming a closed loop in use, or enables the seal to be used with the head detached from the panel, whereby in use the thin body (12) would adopt an open configuration, the panel and the head each forming stoppers at the ends of said thin body.

**Other comments:**

The documents D1 and D2 have not been identified in the description, which is appropriate in the present case, together with a brief summary of their contribution to the relevant background art in accordance with Rule 5.1(a)(ii) PCT.

The claims are not written in clear, technical English, which must be corrected with any further action from the applicant - see, for example, the wording used in 2) above, which provides a clearer definition of the subject-matter corresponding to the current claim 1 of the published application.
